SOFTWARE ENGINEERING 3

Laboratory Exercise 8

PROPOSED TEST STRATEGY FOR THE THESIS STUDY

A. System Context Table

System Area or Component	Brief Description	Main Users

B. Quality Priorities Table

Quality Priority	Why It Matters	Testing Implication

C. Testing Levels Table

Testing Level	Application to the Thesis System	Primary Responsibility
Unit Testing		
Integration Testing		
System Testing		
Acceptance Testing		
Regression Testing		

D. Testing Types Table

Testing Type	What Will Be Evaluated?	Example Application
Functional Testing		
Security Testing		
Usability Testing		
Performance Testing		
Other Appropriate Type		

E. Risk-Based Testing Matrix

Use the following formula: Risk Score = Likelihood × Impact. Use a score from 1 to 5 for both likelihood and impact.

Risk ID	Feature / Area	Possible Failure	L	I	Score	Priority	Proposed Testing Response
R-01							
R-02							
R-03							
R-04							
R-05							

Risk Score	Priority
1–4	Low
5–9	Medium
10–16	High
17–25	Critical

F. Automation Strategy Table

Test Area	Manual / Automated / Partial / Deferred	Proposed Tool	Justification

G. Metrics and Evidence Table

Metric or Evidence	Purpose	Proposed Interpretation
